

Monitoring Framework Example: Cameroon Demonstration Project at Kribi (Grand Batanga, Lobe Falls, Londji beach)

Output/Result	Indicator	Data collection requirements	Data collection tools	Data collection responsibility	Frequency/ milestone check
1. Developed and tested BAPs and BATs for reducing land sourced pollution on coastal environment completed	a) BAP/BAT for fish waste and human waste management on Londji beach effected	Baseline information on environment (beach transect rubbish count-no of trash bins and management of the same), social (environment and public health awareness questionnaire) and economic livelihood data (major sources of livelihood /100%), number of visitors over a monitored time period	Beach transect tool Questionnaires to selected beach users Visitor survey Secondary data sources?	Demo coordinator with support from site management committee and public	Base year, then once every year thereafter at same season and time of day
	b) Community-based enterprises and eco-tourism partnerships at Grand Batanga in place	Baseline information on; the number of existing enterprises, eco-tourism partnerships or contractual arrangements, guidelines from Kribi council	Interviews with relevant stakeholders Secondary data sources?	Demo coordinator with support from site management committee and public, Kribi council	Base year, then once every year thereafter during annual impact assessment exercise
	c) Eco-tourism planning, guidelines development and regulation in place at Lobe falls	Baseline information on land ownership/use Training needs assessment Current awareness levels	Sketch mapping and ownership table Specific training outcomes	Demo coordinator with support from site management committee and public	Base year, then once every year thereafter during annual impact assessment exercise

2. Developed mechanisms for sustainable tourism governance & management	a) Multi-stakeholder group meeting and advocating for improved coastal zone management	Baseline information on identity of members of the group (Proposed or existing), and their resource commitments, existence of any cooperation or coordination in Kribi	Interviews	Demo coordinator with support from site management committee	Base year, then once every year thereafter during annual impact assessment exercise
	b) EIA guidelines development for coastal area	Number and type of recommendations made to change regulations, number and type of investors following guidelines Evidence of EIA regulation + monitoring by responsible office	Questionnaire targeting businesses and tourism enterprises	Demo coordinator with support from site management committee	Base year, then once every year thereafter during annual impact assessment exercise
	c) EIA/EMS awareness among stakeholders at demo sites		Questionnaire	Demo coordinator with support from site management committee	Base year, then once every year then mid term and final year annual impact assessment exercise
3. Delivered training and capacity building in sustainable eco-tourism	a) Locally based training service provider exists/ identified		Interviews MoU document	Demo coordinator and training provider	Base year, then once every year thereafter during annual impact assessment exercise
	b) TNA completed		Consultant report and recommendations	Consultant and Demo coordinator	Base year
	c) Specialist training provided and capacity enhanced	Base year specialist number and final year number	Stakeholder interviews and post training assessments	Demo coordinator with support from site management committee	Every year during annual impact assessment exercise

4. Information to assist in replication and uptake of BAPs/BATs available	a) BATs/BAPs information being utilised locally	Number and type of BAPs/BATs & information being utilised	Stakeholder interviews and site visits	Demo coordinator with support from site management committee	Every year during annual impact assessment exercise
	b) Awareness raising events and information dissemination	Number of events, type, and information distributed	Stakeholder interviews and site visits	Demo coordinator with support from site management committee and public	Every year during annual impact assessment exercise
	c) Sharing and uptake of practices elsewhere beyond project sites	Number of outside events attended and BAPs/BATs presented. Uptake of ideas	Visit /event reports Number of Project enquiries	Demo coordinator	Every year during annual impact assessment exercise
